Subject: Re: Two techs needed MED 1135 office lane expansion project 1618 LEE VICTORY PKWY, Smyrna, TN, 37167

Happy Wednesday, Scott!

I'm checking to see if you all are still available for Phase 2 next week? The office will be closed 7/13-7/17 and needs to be complete and ready for patient care by EOD 7/17.

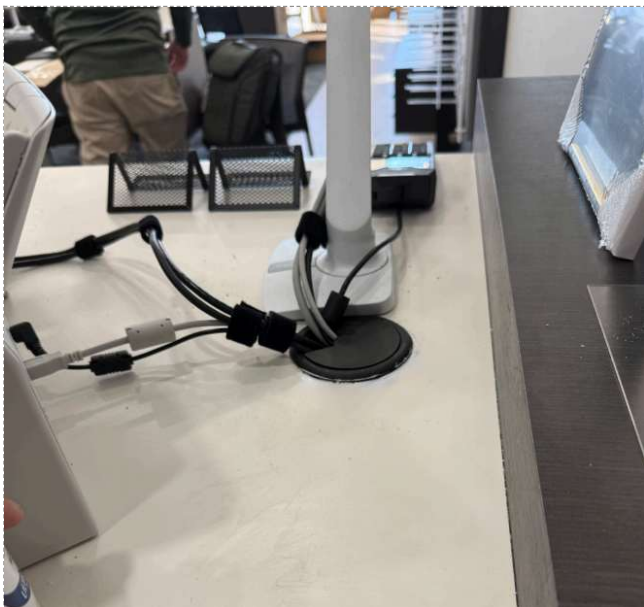

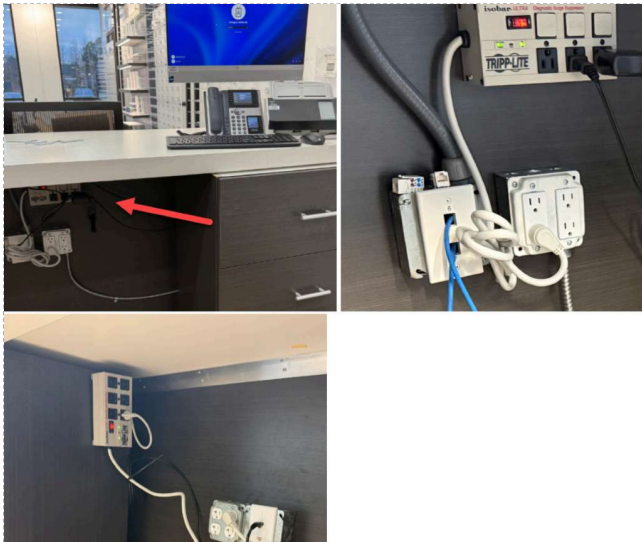

Part 2:

7/13-7/17

- Verify all new data ports on Phase 2 side are patched in and live (yellows are singles/reds are doubles data ports)
- Set up workstations in Phase 2 - work with Gina and onsite staff to log into computers to test - verify printers print - verify phones work calling in/out - verify CC machine works
- Install additional AP (purple oval)
- Work with Gina for Front Desk setup – We'll drill normal size grommet and additional smaller hole for mounting the arm for the all-in-one (please see images below. Please do not drill until touching base with Gina on which side we are mounting the arm for the all-in-one)
- Take pictures and upload images of every new workstation and network area

I'm verifying with Tristan if we want things mounted at the front desk on the left or right side. The drawers under the desk can be moved out so we can drill the holes (one normal sized grommet hole and one small hole for the monitor mounting arm) and run the cords behind the drawers.

Looking forward to hearing back,
Gina Sanders
IT Executive and Office Support/CEO Ambassador

Subject: MED 1135 Smyrna Project Splash Page — AI Workflow Update

Hi Team,

I added two new reference links to the MED 1135 Smyrna project splash page:

<https://techsgt.com/med-1135-smyrna/>

The new links are under **Quick Links**:

[Scott/Alex Working Chat](#)

[Alex Transcript PDF](#)

The Scott/Alex Working Chat and transcript PDF show the behind-the-scenes AI planning discussion used to support this project.

[Scott/Alex Working Chat](#)

This gives support staff and anyone not onsite visibility into how I work with Alex, our project-specific AI assistant, during the day. This shows the working discussion I keep active while onsite so project details, troubleshooting notes, photo references, decisions, and updates stay together in one place instead of being scattered across multiple chats.

[Alex Transcript PDF](#)

This is included so users who do not have an OpenAI account can still review the discussion, images, references, and AI-assisted troubleshooting notes shared during the project.

Anyone who follows the link to Alex can interact with the AI assistant directly. Their interaction will not interfere with my active working chat. It will branch into a new chat for that user, while my onsite project discussion remains intact and continuous.

The purpose of adding these links is to show how Tech Sergeant IT is using project-specific GPTs in real field service work. For every project, we create and deploy an AI assistant that supports the technician with scope review, site details, contact information, documentation, troubleshooting, checklists, photo requirements, and closeout guidance.

We do not send technicians into the field without an [AI assistant](#).

After site completion, the project AI assistant can remain live so support staff, project contacts, and other stakeholders can continue to ask questions about the project, review the work performed, or better understand the decisions and documentation captured during the job.

If anyone has questions or would like more information about using **AI, custom GPTs, GPT swarms, or interactive project splash pages with integrated AI assistants**, please let me know. This is a service model we are continuing to build and refine for field service, project coordination, and client-facing support, and we welcome any feedback that helps us improve it.

There is also a comment section at the bottom of the [MED 1135 Smyrna project splash page](#). Any comments submitted there will be sent directly to me for review and follow-up.

Thank you,

SCOTT JEWETT

Subject: Re: Two techs needed MED 1135 office lane expansion project 1618 LEE VICTORY PKWY, Smyrna, TN, 37167

Hello Team,

A project splash page has been created for the [MED 1135 Smyrna office lane expansion project](#):

<https://techsgt.com/med-1135-smyrna/>

This page is intended to be a quick field reference for the project. It includes the job summary, site details, key contacts with click-to-call links, shipment tracking links, rack notes, patching reference, inventory reference, interactive project images, and closeout/photo upload links.

The page also includes an interactive checklist. When a checklist item is marked complete, it will show as completed with a line through the item and save globally so other users can see the updated status.

Alex, is our AI Network Deployment Field Assistant. Alex appears as a floating assistant bubble in the lower-right corner on the splash page. Select "Ask me a question" to open the GPT assistant for help with rack build guidance, patching, WAP setup, testing, closeout steps, or issue verification.

There is also a comments section at the bottom of the splash page for questions, comments, or suggestions; I will receive those submissions by email.

Please use the splash page as the central reference during the project and technicians will upload required photos through the provided photo upload links to myeyedr.com.

Thank you,

SCOTT JEWETT

Happy Thursday, Team!

Thanks Scott and Chris for being our techs for this project. My number is 571-334-6656 if texting works well for you. We'll see if Cameron can add you to a Teams chat for communication if/as needed too.

Here are the basics. Please review and let me know what questions you have. Please know that Monday and Tuesday, the office team will be onsite moving things over as well.

1618 LEE VICTORY PKWY, Smyrna, TN, 37167

GM: Tristan Brown

Lockbox code if needed: 3900

Part 1:

5/18-5/19

FIRST: Take pictures of network area (phase 2 side) and each new workstation on the phase 1 side - [Upload pictures here](#)

- Will provide packing list of what was ordered – please verify inventory
- Cables from Phase 1 should be run to the network room and looped
- Update network rack: (Will provide MED Standards)
 - Move cantilever shelf down to just above PDUs
 - Move Modem mount down
 - Cut existing patch cables – remove old patch panel
 - Replace with new keystone patch panel
 - Add additional keystone patch panel below the existing switch
 - Add new switch below **SN: Q3LR-NY6R-3YK8**
 - Terminate and patch in all existing and new cables
 - Install firewall in mounting kit
- Verify all new data ports in Phase 1 live
- Install new Aps (please see floorplan) **SNs: Q3ND-ETGP-HQ5K | Q3ND-GGV2-JL7M**
- Will provide inventory list of workstations we are moving from Phase 2 and setting up where in Phase 1
- Set up workstations - partner with MED associate that all computers are up and running, printers working, CC machine tested, tracer reconnected
- Take and upload images of finished network rack and all workstations - [upload pictures here](#)

Subject: Two techs needed MED 1135 office lane expansion project 1618 LEE VICTORY PKWY, Smyrna, TN, 37167

Happy Tuesday, Cameron!

We have an "office refresh" or "lane expansion" project where we need a couple techs at two different times

Here are the basics:

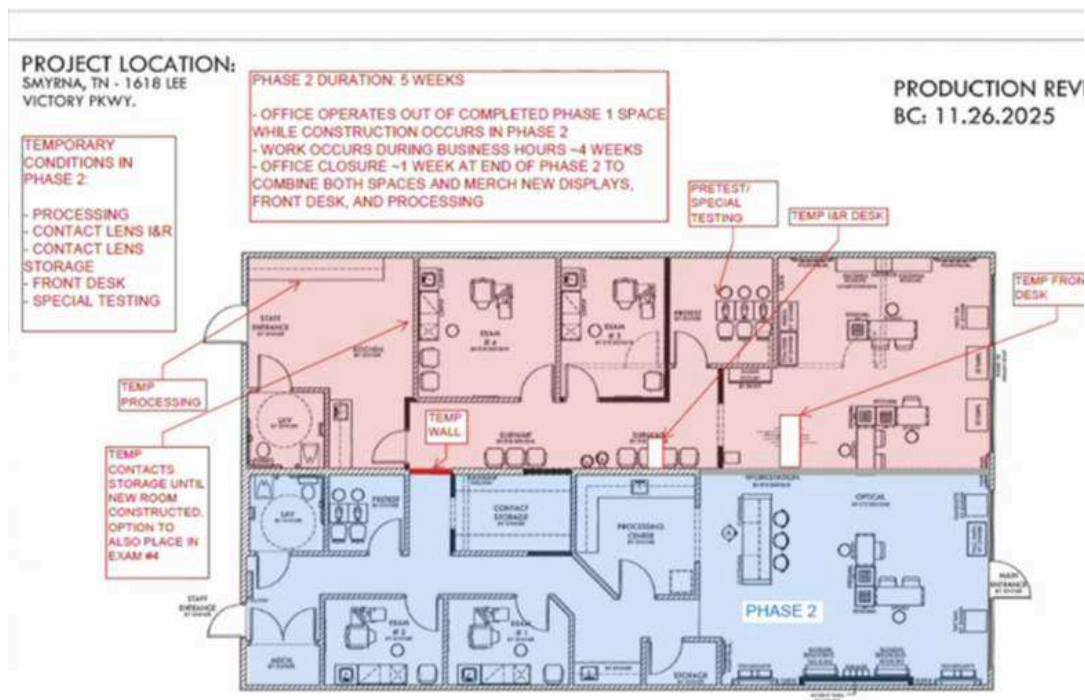

1618 LEE VICTORY PKWY, Smyrna, TN, 37167

Part 1:

5/18-5/19

FIRST: Take pictures of network area (phase 2 side) and each new workstation on the phase 1 side - will provide link to load

- Will provide packing list of what was ordered – please verify inventory
- Cables from Phase 1 should be run to the network room and looped
- Update network rack: (Will provide MED Standards)
 - Move cantilever shelf down to just above PDUs
 - Move Modem mount down
 - Cut existing patch cables – remove old patch panel
 - Replace with new keystone patch panel
 - Add additional keystone patch panel below the existing switch
 - Add new switch below **SN: Q3LR-NY6R-3YK8**
 - Terminate and patch in all existing and new cables
 - Install firewall in mounting kit
- Verify all new data ports in Phase 1 live
- Install new Aps (please see floorplan) **SNs: Q3ND-ETGP-HQ5K | Q3ND-GGV2-JL7M**
- Will provide inventory list of workstations we are moving from Phase 2 and setting up where in Phase 1
- Set up workstations - partner with MED associate that all computers are up and running, printers working, CC machine tested, tracer reconnected
- Take and upload images of finished network rack and all workstations

Part 2:

7/13-7/17

- Verify all new data ports on Phase 2 side are patched in and live
- Set up workstations in Phase 2
- Work with MED associate for Front Desk setup – We'll drill normal size grommet and additional smaller hole for mounting the arm for the all-in-one
- Take pictures and upload images of every new workstation and network area

Thanks,

Gina Sanders
